World leader in secure financial transaction solutions

# Elite 210/230

## *Cheque reader range*

The Ingenico Group designs, manufactures and markets secure electronic payment terminals and payment systems for traditional and Internet-based merchants worldwide.

The Elite 210 and the Elite 230 are based upon proven Ingenico hardware. They protect businesses against significant fraud losses while improving merchant and bank productivity.

### FEATURES AND BENEFITS

- The Elite 210 can be connected to a payment terminal or a cash register through RS232 port and specific protocol.
- The Elite 230 is exclusively associated with our portable Elite 730. The Elite 230 is effectively an Elite 730 base station with cheque reading/printing capabilities. The Elite 730 and Elite 230 form a Smart cost-effective and compact solution.
- Automatic printing speeds up transactions and helps reduce queues. It also eliminates errors associated with interpretation of hand-written cheques.
- CMC7 reading protects users from cheque fraud
- Multi-line printing enables emphasis of important details such as amount or currency. Today the Elite 210 and 230 are the only cheque readers on the market to offer this feature.
